OBJECTIVE

Dedicated software professional equipped with practical experience. Looking to apply analytical thinking and technical proficiency in Java, Python, and modern web frameworks to solve real-world problems and drive organizational success.

SKILLS

Languages: Java, SQL, Python

Technologies: Git, GitHub, Postman, SpringBoot, FastAPI, Machine Learning, Deep Learning, Lang-graph

EDUCATION

2021 - 2025	B.Tech Artificial Intelligence & Data Science Knowledge Institute Of Technology	7.9 C.G.P.A
2020 - 2021	H.S.C - Computer Science Sri Vinayaga Matric Hr. Sec. School	85 %

INTERNSHIP

01/2024 - 03/2025	Data Scientist Intern Smart Attendance System: Designed and developed an AI-powered attendance tracking system using Computer Vision and Deep Learning, enhancing process accuracy and automation efficiency. Data Annotation and Model Training: Performed high-quality data annotation for deep learning models and contributed to the training of object detection models, ensuring robust and accurate performance. Computer Vision / Deep Learning / Data Annotation / AI	Punchbiz
07/2023 - 08/2024	Software Developer Intern Automated Daily Production Planning: Developed an automated scheduling system at JSW Blooming Mill, optimizing production efficiency and ensuring on-time operations through streamlined workflow processes. Resource Allocation Optimization: Implemented data-driven solutions to enhance resource utilization, significantly improving workflow efficiency and reducing operational bottlenecks. Workflow Automation / Python / Web Development	JSW

PROJECTS

Full Stack AI	OCR Web Application - Developed a Django-based OCR Web Application using PydanticAI to extract text from uploaded images, featuring secure user authentication, email verification, and server-side image management. - Integrated Google Translate API for multilingual translation and TextBlob for spell checking, delivering a responsive front-end using HTML, CSS, and JavaScript. Django / PydanticAI / Google Translate API / JavaScript	GitHub Link
Microservices	SEO Optimizer Platform - Built a full-stack SEO platform using Spring Boot, FastAPI, React (Vite), and Tailwind CSS with JWT authentication, HttpOnly cookies, Google OAuth2, and password verification flows. - Designed a two-backend architecture where a Spring Boot service handles authentication and issues tokens verified by a FastAPI AI service for secure keyword analysis and SEO audits. Spring Boot / FastAPI / React / Tailwind CSS	GitHub Link

ACHIEVEMENTS

2024	Appreciation Award – Best Consultant Project Honored for developing an automated production schedule system for JSW.	Knowledge Institute Of Technology
2024	Winner, National 24-Hour AI/ML Hackathon Won 1 st prize at the National AI/ML Hackathon (BIT V-Prayukti) for developing innovative integration solutions for visually impaired and deaf/mute individuals.	Bannari Amman Institute of Technology
2023	Best Make a Product Project Received 1 st prize in the department-level "Make a Product Expo" for a collaborative project on Result Analysis and Visualization.	Knowledge Institute Of Technology
